Print at 100%. Measure the 50 mm bar. IDs are not sticker artwork.

Assembly: begin with a solved cube

Choose and retain Front (F) and Up (U). Do not turn faces while applying stickers.
Every grid is viewed from outside. Match source IDs to the numbered sheet map.
Keep each loose sticker in its printed orientation relative to that face top.
U face top points toward B; D top toward F; all side face tops point toward U.
C1, C2, ... identify complete copies. Blank stickers are required physical stickers.
After application the cube is in its source pose. Use the setup words below.
R/L/U/D/F/B turn that face clockwise from outside; apostrophe reverses it, 2 is a half turn.
x/y/z rotate the whole cube in the R/U/F direction. Read left to right in the current view.
